Edited by Peter G. Neumann (Risks Forum Moderator and Chairman of the ACM Committee on Computers and Public Policy), plus personal contributions by others, as indicated. Opinions expressed are individual rather than organizational, and all of the usual ...

4   A content-driven access control system
Jessica Staddon, Philippe Golle, Martin Gagné, Paul Rasmussen
March 2008 IDtrust '08: Proceedings of the 7th symposium on Identity and trust on the
             Internet
Publisher: ACM
Full text available: pdf(1.54 MB)   Additional Information: full citation, abstract, references, index terms

Protecting identity in the Internet age requires the ability to go beyond the identification of explicitly identifying information like social security numbers, to also find the broadly-held attributes that, when taken together, are identifying. We present ...

Keywords: access control, attribute-based encryption, inference control, revocation, secret sharing

5   Scanning electronic documents for personally identifiable information
Tuomas Aura, Thomas A. Kuhn, Michael Roe
October 2006 WPES '06: Proceedings of the 5th ACM workshop on Privacy in electronic
              society
Publisher: ACM
Full text available: pdf(346.07 KB)   Additional Information: full citation, abstract, references, index terms

Sometimes, it is necessary to remove author names and other personally identifiable information (PII) from documents before publication. We have implemented a novel defensive tool for detecting such data automatically. By using the detection tool, we ...

Keywords: metadata, personally identifiable information, privacy

6   Productivity as a metric for visual analytics: reflections on e-discovery
Sean M. McNee, Ben Arnette
April 2008 BELIV '08: Proceedings of the 2008 conference on BEyond time and errors: novel
            evaLuation methods for Information Visualization
Publisher: ACM
Full text available: pdf(467.54 KB)   Additional Information: full citation, abstract, references, index terms

Because visual analytics is not used in a vacuum, there are no cut-and-dry metrics which can accurately evaluate visual analytic tools. These tools are used inside of existing business processes, thus metrics to evaluate these tools must measure the ...

Keywords: Attenex, e-discovery, information visualization, metrics, process, productivity, visual analytics

7   Preserving privacy in web services

Abdelmounaam Rezgui, Mourad Ouzzani, Athman Bouguettaya, Brahim Medjahed
November 2002 WIDM '02: Proceedings of the 4th international workshop on Web
                information and data management
Publisher: ACM

Full text available: ▦ pdf(238.19 KB)   Additional Information: full citation, abstract, references, cited by, index
                                                                          terms

Bibliometrics: Downloads (6 Weeks): 16,   Downloads (12 Months): 248,   Citation Count: 11

Web services are increasingly being adopted as a viable means to access Web-based
applications. This has been enabled by the tremendous standardization effort to describe,
advertise, discover, and invoke Web services. Digital government (DG) is a major ...

Keywords: digital government, mobile agents, privacy, web services

8   Quantifying information leakage in document redaction

Daniel Lopresti, A. Lawrence Spitz
November 2004 HDP '04: Proceedings of the 1st ACM workshop on Hardcopy document
                processing
Publisher: ACM

Full text available: ▦ pdf(563.02 KB)   Additional Information: full citation, abstract, references, index terms

Bibliometrics: Downloads (6 Weeks): 6,   Downloads (12 Months): 38,   Citation Count: 0

In this paper, we examine ways in which sensitive information might leak through the
process of redaction. Such attacks apply known methods from document image analysis
and natural language processing to recover text thought to have been obliterated ...

Keywords: character shape coding, classified documents, document analysis, document
redaction
